

Gas Well Workshops

Using the Gas Well Workshops Moodle Interface

The Gas Well Workshops website uses a Moodle interface to present course materials. Moodle is open source software used in schools, colleges and industry training programs for online learning.

The screen shots shown here are for a laptop/desktop view. The website is designed to also be accessed on pads and phones; the mobile version's appearance for the site will be slightly different.

Entering the Workshops website

The workshops are at <http://workshops.sootypaws.net/moodle/>.

The screenshot displays the Moodle interface for Gas Well Workshops. At the top, there is a header with 'Workshops' and 'English - United States (en_us)'. On the right side of the header, it says 'You are not logged in' with a '(Log In)' link circled in red. Below the header, the main content area is titled 'Gas Well Workshops'. On the left, there are two sidebars: 'MAIN MENU' with 'Site news' and 'NAVIGATION' with 'Home', 'Site news', and 'Courses'. The main content area features a section titled '2015 Gas Well Workshops' with a welcome message and a link to a workshop. Below this is a section titled 'Available courses' with a course titled 'Using West Virginia Online Resources' by George Monk. On the right, there is a '2015 Gas Well Workshops' section with a description and a link to 'Using West Virginia Online Resources'. At the bottom right, there is a 'CALENDAR' for May 2015.

Sun	Mon	Tue	Wed	Thu	Fri	Sat
					1	2

Some courses may allow guest access

Is this your first time here?

Hi! For full access to courses you'll need to take a minute to create a new account for yourself on this web site. Each of the individual courses may also have a one-time "enrollment key", which you won't need until later. Here are the steps:

1. Fill out the [New Account](#) form with your details.
2. An email will be immediately sent to your email address.
3. Read your email, and click on the web link it contains.
4. Your account will be confirmed and you will be logged in.
5. Now, select the course you want to participate in.
6. If you are prompted for an "enrollment key" - use the one that your teacher has given you. This will "enroll" you in the course.
7. You can now access the full course. From now on you will only need to enter your personal username and password (in the form on this page) to log in and access any course you have enrolled in.

A successful application will result in an email sent to the email address you gave. Click on the link in the email and you will be logged into the Workshops site. When you click on the "Courses" link you'll be taken to a page showing course categories. If you know the course you want, click the category (the triangle next to the category should be sideways) and the course will appear below the category. Or, click on the Home link which appears in the breadcrumbs links in the header, in the Navigation block, or at the bottom of the page.

Navigation

Gas Well Workshops opens on a page showing available workshops. If you've enrolled in a workshop that workshop will be shown in a separate block below the available workshops.

To enroll in a workshop you'll need a special key. To get a key contact George (gmonk@citynet.net). The key will only need to be used once.

In the Workshop

Each workshop has a home page which has a number of navigation features. This section of the handout will describe how to move about within a workshop.

Breadcrumbs

A group of links called breadcrumbs appears at the bottom of the header banner with the workshop name.

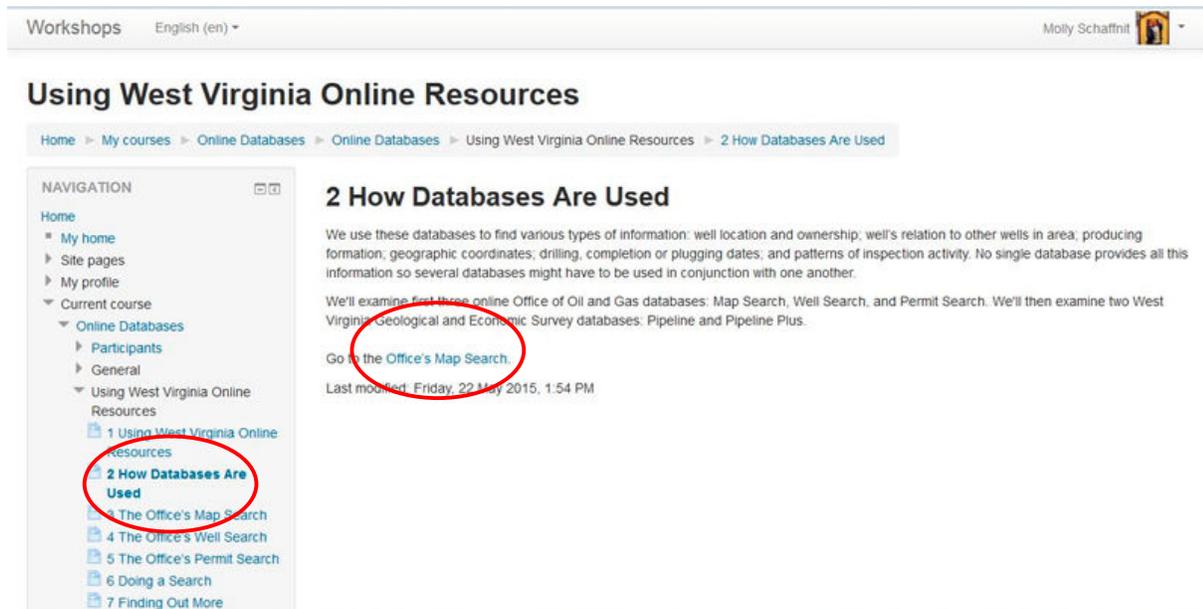

Using West Virginia Online Resources

[Home](#) ▶ [My courses](#) ▶ [Online Databases](#) ▶ [Online Databases](#) ▶ [Using West Virginia Online Resources](#) ▶ [2 How Databases Are Used](#)

The link furthest to the left will take you back home, to the page you see when you enter the Gas Well Workshops site. The link furthest to the right tells you exactly where you are. Links in between will include the workshop front page.

Links to pages within a Workshop

On most pages within a workshop there will be a link to the next page. There are also links on the sidebar in the Navigation block for pages and quizzes within a workshop.

There may also be links on a page to documents or external websites. In most cases documents can also be found in a folder for the workshop.

Navigation within a workshop is more consistent if you don't use your browser's forward or back buttons.

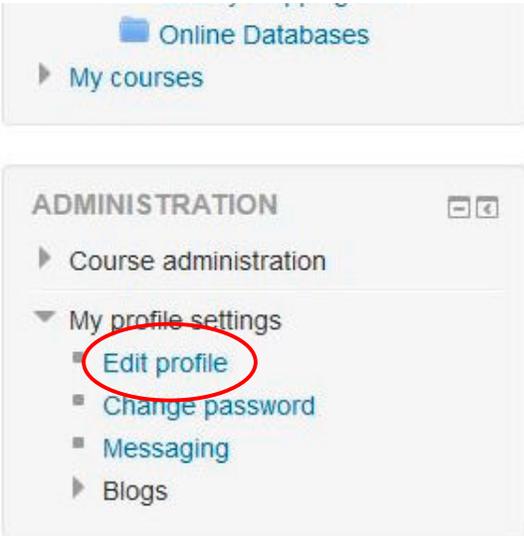

Elements on the Page

Depending on where you are within the Gas Well Workshops website, there will be a main text area with a sidebar to the left and sometimes also a sidebar to the right.

The sidebars are constructed of elements called blocks. The blocks that appear on a page will vary as you move through a workshop.

Administration Block

The Edit Profile link takes you to a page where you can provide more material for your profile, including uploading a photograph.

Navigation Block

This block is on the left sidebar and includes links for all the pages, quizzes and other resources for the workshop. The last resource in the list is the folder holding downloadable documents.

Using West Virginia Online Resources

We'll look at West Virginia online oil and gas resources that are available to the public. We'll focus on some - the Office of Oil and Gas' Map Search, Well Search and Permit Search, and the West Virginia Geological and Economic Survey's (WVGES) Pipeline databases.

This workshop is not being monitored closely. If someone completes a quiz, contact George (gmonk@citynet.net) to grade it.

Download a [handout](#) showing how to use these online resources.

The Text Entry Box

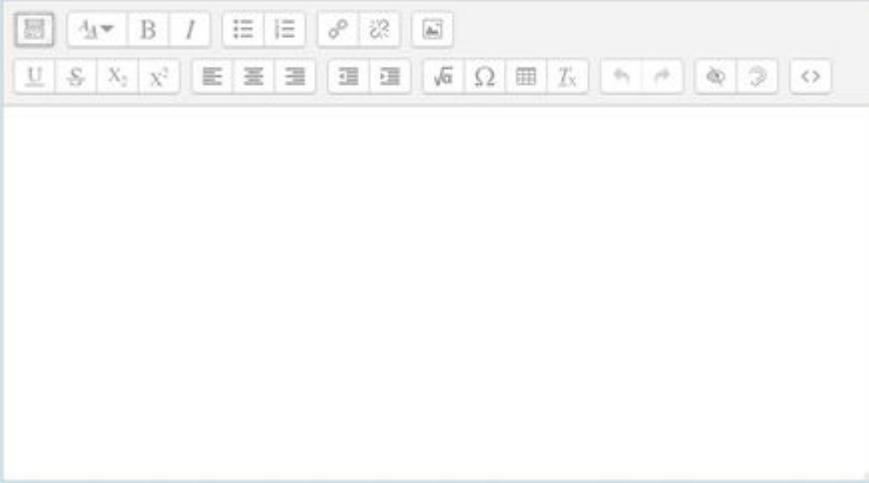

A basic text entry box is used for quizzes where you can type out an answer. This text box has a group of buttons along the top. These buttons allow changes in font display and arrangement as a bulleted or numbered list. If you know of an online photo you want to include in your answer, you can use the image button. The photo's link is needed for the photo to appear in the answer.

Clicking on the button furthest to the left expands the buttons to provide more options for formatting the text.

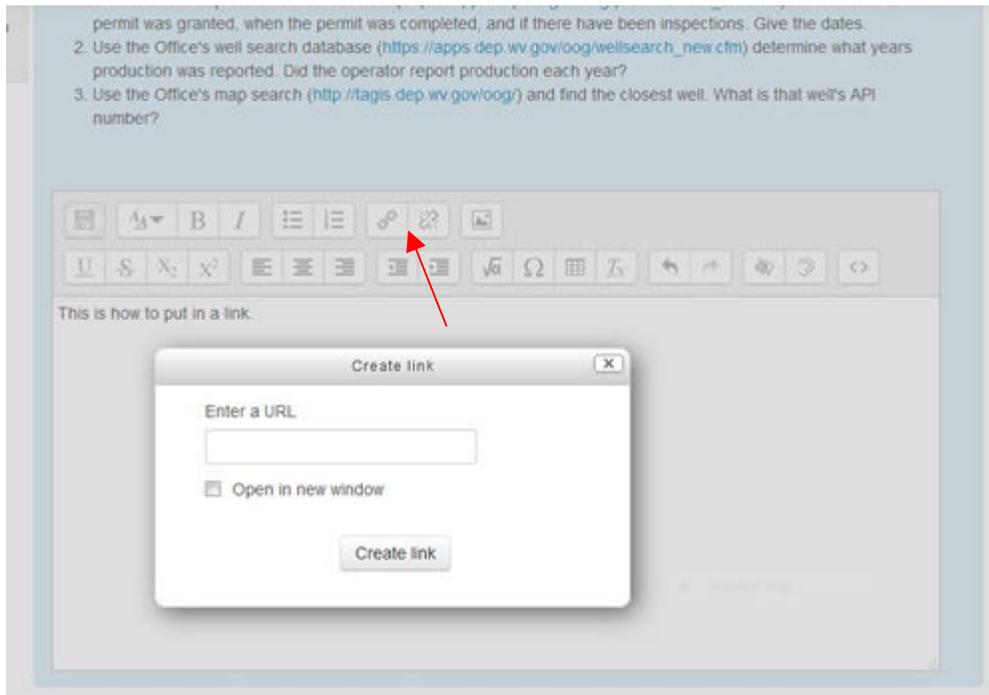

well's permit was granted, when the permit was completed, and if there have been inspections. Give the dates.

2. Use the Office's well search database (https://apps.dep.wv.gov/oog/welsearch_new.cfm) determine what years production was reported. Did the operator report production each year?
3. Use the Office's map search (<http://tagis.dep.wv.gov/oog/>) and find the closest well. What is that well's API number?

The image shows a rich text editor toolbar with two rows of icons. The first row includes icons for text color, background color, bold, italic, bulleted list, numbered list, link, unlink, and image. The second row includes icons for underline, strikethrough, subscript, superscript, indent left, indent right, outdent, link, unlink, source code, undo, redo, and a double arrow icon.

To add a link type some text, select part of that text, and then click the link button which will bring up a box where you can put in the url.

If you select for the target "Open in new window," people clicking on the link will have a new tab open on their browser.

Remember to click the save button before leaving the page.
